

From Soncho's Desk

## The "GAN" Fighter Sunset Continued

– January 2015

※ Started prostate hormone treatment.

After 6 months of therapy, the radiation treatment will begin and subsequent 2 more years of hormone therapy.

※ A bit of weariness ...? The side effects of the hormone therapy.

Driving is OK. The distance of my golf ball will decrease because of decreasing male hormone. Being careful of bone problems such as osteoporosis because the treatment is suppressing the male hormone. In preventing osteoporosis, sun bathing is helpful because it produces Vitamin B which helps the body in the absorption of calcium.

※In the next 3 years the hormone treatment may create a more feminine manner.

It may be nice for some FIA staff in the office. And to not laugh when Soncho suddenly needs to run to the anmitsu (sweet bean paste) shop to buy some sweets because of the hormone influence.

※ There may be a relationship between the loss of the male hormone and the loss of man's "Pride"? The Bushido and the man's pride, is it the same as the British chivalry?

### ※Jim Heron comes to Japan.

The Executive Director of the Japanese Cultural Center in Canada,  
Advisor for the Premier movie "Vancouver Asahi"

12 year career as an FIA trainer

The bilingual liaison at the time of the Japanese Emperor's visit to Canada.

Are there people like him where it takes 10 years to reach official Level 1 of Japanese Language Proficiency Test. **The Slowest Learner Award in FIA!**

Shoichi Kaneko

Anyone who would like a copy of the original Japanese please email or fax a request to
